**COMING SOON**

## **MOTOROLA** CLP Two-way Radio

Comfortable. Lightweight. Portable.

### CLP Radio Controls

- 1 Smart Status Glow – Color indicates active channel, radio transmit & receive, scan, and battery status.
- 2 Push-To-Talk button – Oversized, textured, and centrally located provides easy access.
- 3 Volume Control – 16 adjustable volume levels make CLP easy to hear in any environment.
- 4 Power/Battery Button – Powers device on or off, audio and visual indication of current battery level.
- 5 Accessory Connector – Compact, durable design, for proven Motorola accessories.
- 6 Menu Button – Voice driven menu provides quick access to pre-programmed features: channel, monitor, scan, and call tone.
- 7 Programming Contact – Supports radio programming via Customer Programming Software through charger and data cable.

Now your team can stay connected with the productivity tool that combines comfort, durability, and simplicity. The Motorola CLP Two-Way Radio is the sleek new radio that gets the job done without getting in the way.

Designed specifically for retail, hospitality, and restaurant environments, CLP is small and lightweight, with simple one-button, push-to-talk operation. Clear, strong audio makes communicating easy in noisy environments, and the durable design and long battery life will stand up to the everyday wear and tear of your fast-paced business.

All this performance is packaged in a sleek, contemporary design. Multiple wear options let you hang CLP from a lanyard, versatile magnetic clip, or belt, giving you the comfort and freedom to match your style and workplace environment.

Your customers demand rapid response and superior customer service. Now you can deliver it with style and ease. CLP allows your team to stay connected, reduce errors, and respond quickly to other team members, customers or guests.

The new Motorola CLP—it's productivity with personality.

Stock to be available starting in July!

## **TECHNICS** COMMUNICATION BY INNOVATION

### PROTOTYPING

XTechnics employ professional designers in USA and overseas to design/draft and prototype your projects using modern stereo lithography printers and software.

### PRE-PRODUCTION

XTechnics has the resources to design source and manufacture surface mount circuit boards, components, cases, flex-track connections and cable assemblies.

### MASS PRODUCTION

With a US based assembly line and one in Australia and two Asian based mass production lines the XTechnics Group has the capacity for up to 10,000 units per month.

### DESIGN

Using the latest CAD / CAM resources our XTechnics team of global engineers in USA / Australia / Asia to can draft a concept to meet your requirements

### TESTING

The engineers at XTechnics develop products that meet exact standards to allow your project to meet design criteria and certification

### PRODUCTION

Whether your products requires the molding of thermoplastics, polymers or thermosets, even CNC machining of steel or aluminum we have the resources

## Let us build your accessory!

Looking for a specific accessory and can't find it anywhere? Maybe we can build it for you!

We offer our dealers and customers access to our production team. Just bring us your ideas and concepts... we have the ability to take a concept and turn it into a finished product.

## We also private label

Many of our products can easily be private labelled with your company or brand name on them. If this is something you have been considering and would like to discuss options please contact us. Minimum orders are required on these items but we are confident you will be surprised with the low volume and low cost.

# Feature Products

## BlueLINK - Bluetooth Adapter

The BlueLINK wireless adapter allows the use of a compatible Bluetooth headset with your two-way radio. The adapter easily pairs with thousands of off-the-shelf Bluetooth headsets.

### Product Features:

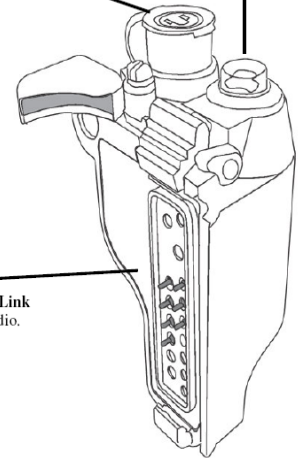

- Push-to-talk switch is on the adapter
- Optional remote Push-to-talk is easily connected
- Easy pairing process. Also remembers paired connection even if the radio is turned off.
- No time delay on transmit or received audio messages
- Available for variety of two-way models

**Quick Disconnect Accessory Port**  
Allows the connection of a BlueLink QD series wired audio accessory, such as a Push-to-Talk, earphone, or auxiliary microphone.

**Multi-Function Talk Switch / Status LED**  
Used to place the BlueLink in pairing mode. The LED flashes messages that let the user know the current status of the BlueLink. Once paired with an audio accessory, this switch is used to activate the Push-To-Talk function of the two-way radio.

**Radio Connector**  
This port connects the BlueLink to a compatible two-way radio.
